The use of the mineral, **Silver**, as an effective antiseptic and immune-support agent dates back hundreds of years. In the late 19th and early 20th centuries, it was the primary choice of physicians for treating infections until antibiotics came along. Unfortunately, the overuse of antibiotics disrupts our digestion, impairs our immunity and creates "super-bugs".

Limited to treating bacterial infections, antibiotics are ineffective with those that are viral or fungal. As an alternative, **Silver Biotics** is a hydrosol (liquid) form of **Silver** used effectively with different kinds of health challenges (bacterial, viral and fungal), including allergies, sinusitis, colds & flu, acne, Candida, skin rashes and intestinal-type infections.

Considered the #1-rated **Silver** available, **Silver Biotics** is available in a liquid, spray, sinus atomizer or topical gel. Impressed by its distinctive purity and quality, many specifically value **Silver Biotics** for its potency, efficacy and safety. It can be used with pets, as well.

As always, we guarantee your satisfaction.
