Natural Foods Market

If you often spend time outdoors in the summer, you know how important it is to have a safe, reliable **insect repellent**. This year, it's especially important to protect yourself with the scare of the Zika virus carried by mosquitos.

A report from Duke University cautions that ordinary **insect repellents** with D.E.E.T. can have damaging effects on brain cells, especially those of children, who are typically more susceptible to such toxic chemicals.

Our natural insect repellents such as **Buzz Away, Badger, Greener Ways** and **Herbal Armor**, contain no harmful chemicals - only natural essential oils, such as citronella, cedar, lemongrass and geranium. Long-lasting and effective with no unpleasant odors or residues, these **natural insect repellents** protect against mosquitoes, bees, wasps and fleas. Environmentally friendly, they can be used safely on kids, infants, the elderly and/or pets.

As always, we guarantee your satisfaction.
